DUCK-BLINKY

Cubic-Vyper • 3 journal entries • Started Mar 28, 2026

This is a duck shaped led chaser, I chose to make it shaped as a duck because I love ducks.

JOURNAL

Cubic-Vyper added to the journal DESIGN 0.33h logged

25d ago

First I add all the pcb files under PCB in the repo

Duck-Blinky / **PCB** /

Cubic-Vyper Add files via upload

0d65370 · now History

Name	Last commit message	Last commit date
..		
Blinky.kicad_pcb	Add files via upload	now
Blinky.kicad_pro	Add files via upload	now
Blinky.kicad_sch	Add files via upload	now
Gerbers.zip	Add files via upload	now

next I export my BOM (.csv) and upload it

Duck-Blinky / **DUCK-BLINKY-bom.csv**

Raw

	Name	Purpose	Quantity	Total Cost (USD)	Link	Distributor
1	PCB	This will connect everything	5	4.00	http://jlcpcb.com/	JLCPCB

now I add the table into the readme

```

1  # Duck-Blinky
2  This is a duck shaped led chaser, I chose to make it shaped as a duck because I love ducks.
3
4  # Bill Of Materials
5
6  | Name | Purpose | Quantity | Total Cost (USD) | Link to Listing | Distributor |
7  |-----|-----|-----|-----|-----|-----|
8  | PCB | This will connect everything | 5 | 4.00 | [Link to Listing](http://jlcpcb.com/) | JLCPCB |
9

```

finaly I add some screenshots

```

9
10 The edge of the pcb is a exposed soldering pad because it looks cool.

now I make the pcb

first I update pcb from schematic

now I find an image to use and iport in to inkscape

now I trace bit map and fill it in

now I add a 100mmx100mm square for reference and resize it

now I export it as a dxf and import it into kicad

now I move the components, i also added a silk screen with the duck details

I changed it to an exposed pad outline (cu and mask), cuz it looks good, and I routed everything (I also had to shrink the duck pattern in inkscape to make it thinner, that took a while)

First I get all my components (this took a while)

now I wire the 555 timer, this took a while, the 555 timer in kicad is different from the tutorial and it took someone else pointing out that the pin numbers are the same for me to notice):

now the leds:

now power pins:

now I assign footprints

Symbol : Footprint Assignments		
1	C1 -	1 uf : Capacitor_THT:CP_Radial_D5.0mm_P2.00mm
